2.4 Notification Icon Alignment .....	6
2.5 Consistent Notification Visibility Across Tabs .....	6
2.6 Typo Fix in Add Control Popup .....	7
Summary of Benefits .....	7

We're excited to announce several improvements designed to enhance your experience with our platform. Here's a summary of the key updates:

# 1. New Features

## 1.1 Action Distribution Pie Chart

A new pie chart displays the distribution of pending, completed, and overdue actions.

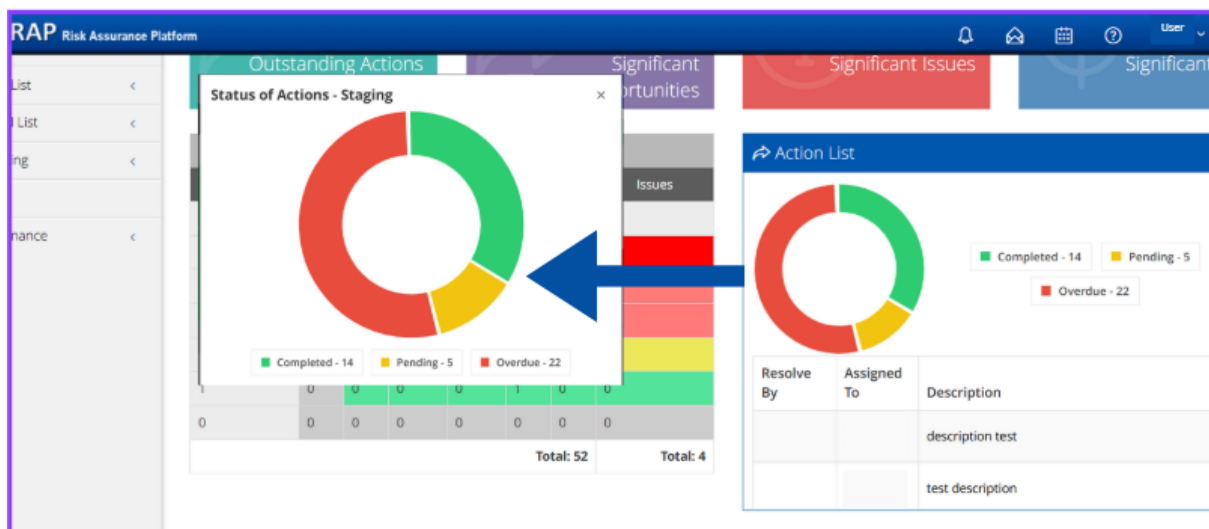

### Why This Matters:

This enhancement improves action tracking and makes it easier to understand the overall progress and bottlenecks.

### How to Navigate:

1. Go to **Dashboard** → **Select Organisation**
2. Scroll to **Action List** to view the pie chart

### Snapshot:

## 1.2 Risk Status Chart

We've added a chart that displays the status of risks across organisational units, categorized into *Open*, *In Progress*, *Mitigated*, and *Closed*.

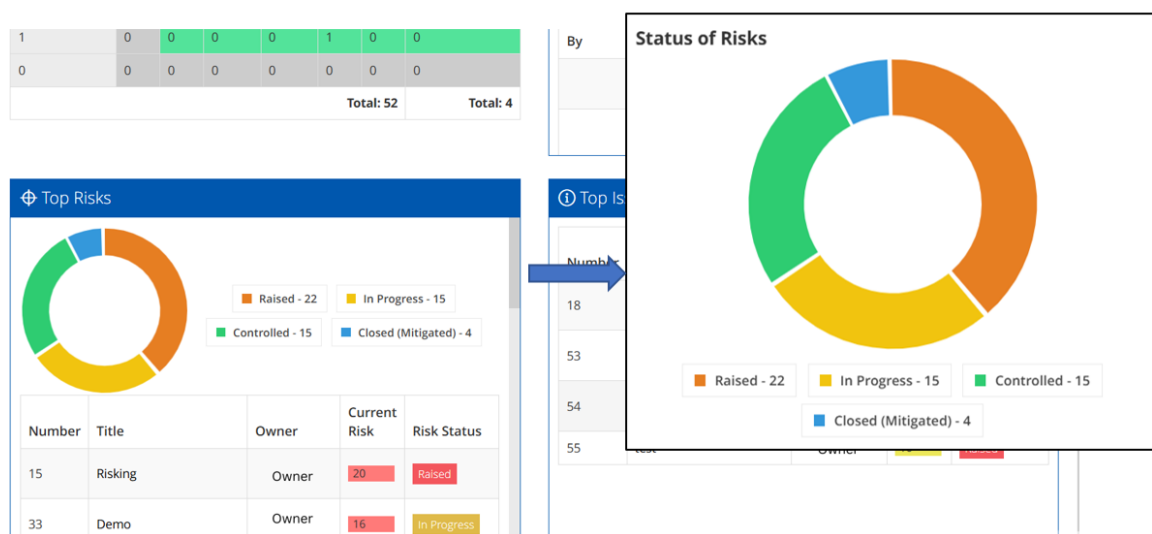

### Why This Matters:

This gives you instant visibility into the overall risk lifecycle. By quickly identifying how many risks are still active versus resolved, teams can prioritize attention where it's most needed and better track mitigation progress.

### How to Navigate:

1. Go to **Dashboard** → **Select Organisation**
2. Scroll to **Top Risks** to view the pie chart

### Snapshot:

## 1.3 Print Individual Risk Details

You can now generate a **PDF** containing the details of a single risk, without having to print or export the entire list.

### Why This Matters:

This saves time and paper and makes it easier to share or review an individual risk with stakeholders.

### How to Navigate:

1. Go to **Risk List** → **Select a Risk** → **Export to PDF**

## Snapshot:

**Risk/Issue Register Identification Form**

**Risk / Issue Details**

Title: Test risk

Raised: 04/10/2017

Status: 2

No.: 3

Escalation Level: 1

Title: Test risk

Description of Threat: Another test risk ex. test risk same button

**Impact**

Level	Severity	Initial Risk	Current Risk	Target Risk
1	Negligible	4	4	2
2	Minor			
3	Moderate			
4	Significant			
5	Serious			
1	Negligible		1	
2	Minor			
3	Moderate			
4	Significant			
5	Serious			
1	Negligible		3	1
2	Minor			
3	Moderate			
4	Significant			
5	Serious			
1	Negligible			
2	Minor			
3	Moderate			
4	Significant			
5	Serious			

**Actions**

No.	Title	Date action input	Action	Action By	Resolves Date	Complete
3	test risk	21/03/2025	DISC	owner	26/03/2025	
		24/03/2025	disc	owner		
		24/03/2025	action disc 5	owner		
		24/03/2025	Test action	owner	25/03/2025	

**Controls**

No.	Title	Control	Assigned To	Assessment
3	test risk			

## 2. Enhancements

### 2.1 Hidden Keywords Field When Empty

The keywords field is now hidden if no keywords are entered.

#### Why This Matters:

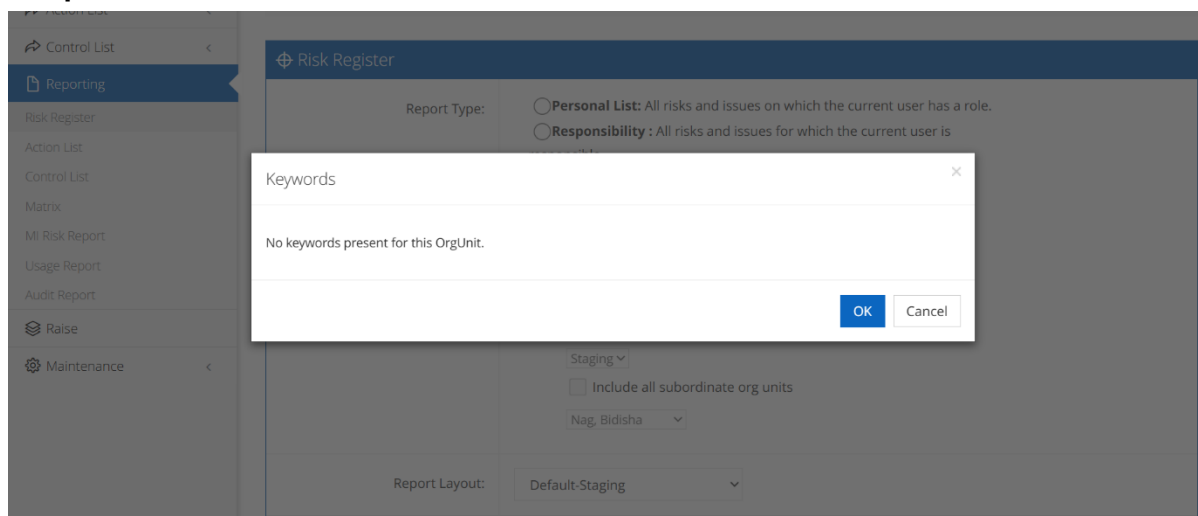

This reduces visual clutter, ensuring that forms are cleaner and easier to navigate.

#### How to Navigate:

1. Open **Reporting** → **Risk Register** → **Scroll Down**

2. If no keywords are set, the field shows the message 'no keywords present for this orgunit'

### Snapshot:

## 2.2 Mandatory Exposure Dates

Exposure dates are now a required field when adding or editing a risk.

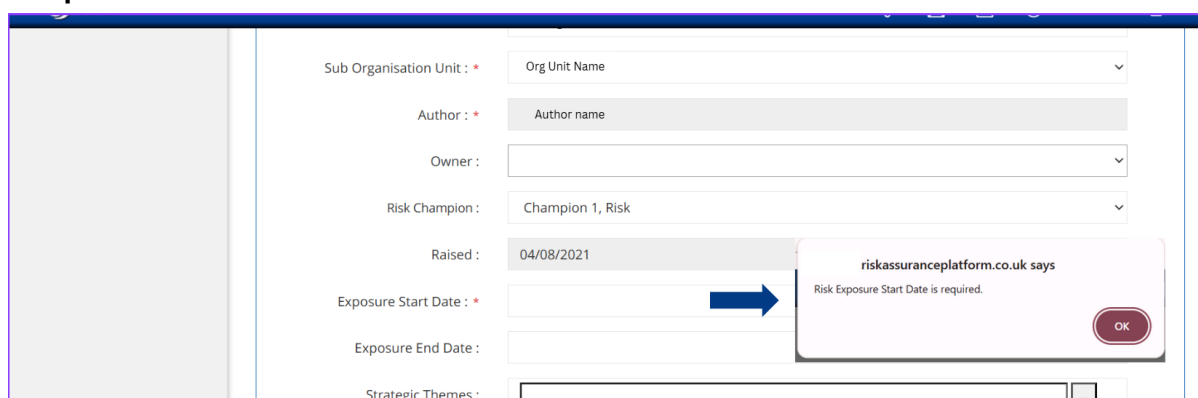

### Why This Matters:

This ensures that all risks have proper timelines, leading to more accurate tracking and compliance.

### How to Navigate:

1. Open **Risk Details** → **Exposure Section**
2. Exposure date fields are now marked with a red \*

### Snapshot:

## 2.3 Reordered Impact Criteria (Likelihood First)

The impact criteria order has been updated so that “Likelihood” now appears first.

### Why This Matters:

This matches standard risk assessment practices, making evaluations faster and more intuitive.

### How to Navigate:

1. Go to **Risk → Current Score / Original Score / Target Score**
2. Likelihood is now listed as the first option

### Snapshot:

The screenshot shows the 'Overview' tab in the RAP Risk Assurance Platform. The interface includes a sidebar with 'Reporting', 'Raise', and 'Maintenance' options. The main content area displays a table with columns: Detail, Original Score, Controls, Current Score, Target Score, Action Plan, and Audit. The table has three rows: 'Likelihood', 'Financial Impact', and 'Reputation Impact'. Each row has a 'clear' button and several radio button options. In the 'Likelihood' row, the 'Likely' option is selected. In the 'Financial Impact' row, the 'Moderate' option is selected. In the 'Reputation Impact' row, the 'Minor' option is selected.

Detail	Original Score	Controls	Current Score	Target Score	Action Plan	Audit
Likelihood ⓘ	clear	Rare <input type="radio"/>	Low <input type="radio"/>	Moderate <input type="radio"/>	Likely <input checked="" type="radio"/>	Almost Certain <input type="radio"/>
Impact						
Financial Impact ⓘ	clear	Negligible <input type="radio"/>	Minor <input type="radio"/>	Moderate <input checked="" type="radio"/>	Significant <input type="radio"/>	Serious <input type="radio"/>
Reputation Impact ⓘ	clear	<input type="radio"/>	Minor <input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## 2.4 Notification Icon Alignment

Icons on the notification page are now properly aligned.

### Why This Matters:

Improved readability and cleaner presentation make it easier to scan through notifications.

### How to Navigate:

1. Navigate to **Notifications List**
2. Observe aligned icons across the list

## 2.5 Consistent Notification Visibility Across Tabs

Notifications now appear correctly when switching between the **Action List** and **Other** tabs.

### Why This Matters:

You won't miss important updates or viewed updates regardless of which tab you're on.

### How to Navigate:

1. Open **Action List**
2. Switch to **Other Tab** — notifications will persist if any

---

## 2.6 Typo Fix in Add Control Popup

We've corrected a typo in the **Add Control** popup.

### **Why This Matters:**

This improves clarity and professionalism, reducing confusion when adding controls.

### **How to Navigate:**

1. Navigate to **Risk → Controls → Add Control**
2. The pop-up now displays corrected labels

---

## Summary of Benefits

- Cleaner UI with hidden unused fields
- Better insights with new charts
- Mandatory data entry for accuracy
- More intuitive assessment flow
- Easier printing of single risks
- Clearer, more consistent notifications
