

RELEASE NOTES

Deployment Date	13.01.2026
Support Email	Viralapps.Support@viralapps.co.uk
Document Publish Date	09.01.2026
Development Team	Viral Apps Support Team
Release Type	Minor

Contents

1. Enhancements	2
1.1 RAP Knowledge Base Updated — Documentation Aligned with Latest Enhancements	2
1.2 Keyword Creation During Risk & Action Tagging — New Keywords Can Be Added Instantly	3
2. Issues	3
2.1 Organisation Unit Creation Error Resolved — Keyword Assignment Now Works Correctly	3
Summary of Benefits	4

We are pleased to announce a number of improvements designed to enhance your experience with our platform. Below is a summary of the key updates:

1. Enhancements

1.1 RAP Knowledge Base Updated — Documentation Aligned with Latest Enhancements

The RAP Knowledge Base (KB) articles have been updated to reflect the latest system enhancements and functional changes. This ensures that users and administrators can rely on accurate, up-to-date documentation when using the platform.

Why This Matters:

Previously, some KB articles did not fully reflect recent feature updates, which could lead to confusion or outdated guidance. With this update, the Knowledge Base now aligns closely with current system behaviour, helping users understand new features and workflows more clearly.

1.2 Keyword Creation During Risk & Action Tagging — New Keywords Can Be Added Instantly

Users can now add a new Keyword directly while tagging a Risk or Action item. This enhancement removes the need to predefine keywords separately and allows tagging to be completed seamlessly within the same workflow.

Why This Matters:

Earlier, users were limited to selecting only existing keywords, which could interrupt workflows when a suitable keyword was not available. This update improves flexibility, ensures more accurate classification, and reduces dependency on administrative setup for keyword management.

How to Navigate:

- Create or edit a Risk or Action item.
- Open the Keyword tagging field.

-
- Add a new Keyword directly if the required one does not exist.
-

2. Issues

2.1 Organisation Unit Creation Error Resolved — Keyword Assignment Now Works Correctly

An issue on the Organisation Unit screen that caused an error when creating a new Org Unit with associated keywords has been fixed. Users can now create Organisation Units and assign keywords without encountering system errors.

Why This Matters:

Previously, the error prevented successful Org Unit creation when keywords were involved, blocking administrative setup and causing unnecessary retries. This fix ensures a smooth and reliable Org Unit configuration process.

How to Navigate:

- Navigate to Organisation Unit Management.
 - Create a new Organisation Unit.
 - Add keywords and save without errors
-

Summary of Benefits

- **Up-to-Date Documentation** — RAP Knowledge Base now reflects the latest system enhancements.
- **Improved Keyword Flexibility** — New keywords can be created instantly during Risk and Action tagging.
- **Stable Org Unit Configuration** — Organisation Units can be created with keywords without errors.
