2.2 Navigation – Default Page Display Fix	5
2.3 Organisation Dashboard – Status Column Alignment Fix	6
2.4 FAQ to Organisation Dashboard – Server Error Fix	7
Summary of Benefits.....	7

We are pleased to announce a series of improvements aimed at enhancing usability, clarity, and reliability across the platform. Details of the resolved issues are outlined below.

1. Enhancements

1.1 Application UI – Tools Dropdown Styling

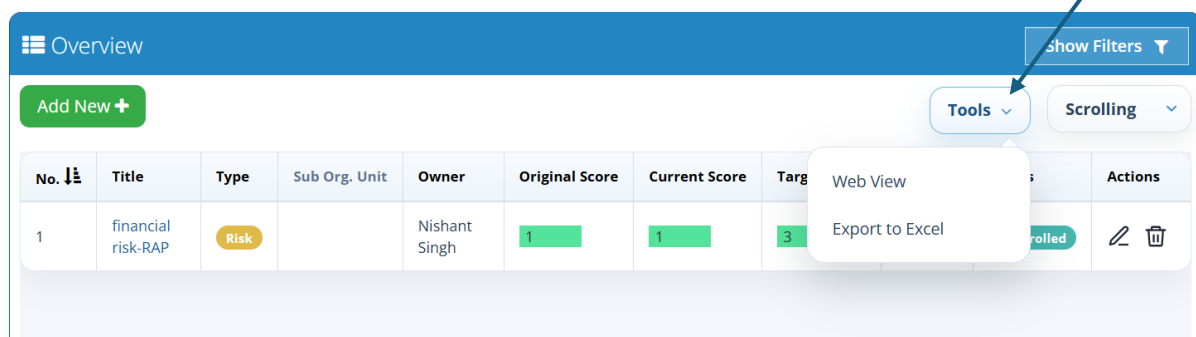

The Tools dropdown has been updated with improved background styling, selected item colour, and scrolling colour to provide a cleaner and more consistent user experience.

Why This Matters:

This improves visual consistency and makes dropdown actions easier to use across RAP screens.

How to Navigate:

- Log in to RAP
- Open any page that contains a Tools dropdown
- Click Tools
- Review the dropdown background, selected item colour, and scrolling colour
- Confirm the updated styling appears consistently

1.2 Application UI – Page-Level Action Icons Added

Icon assets have been added for page-level actions such as edit, delete, close, and similar actions across the application.

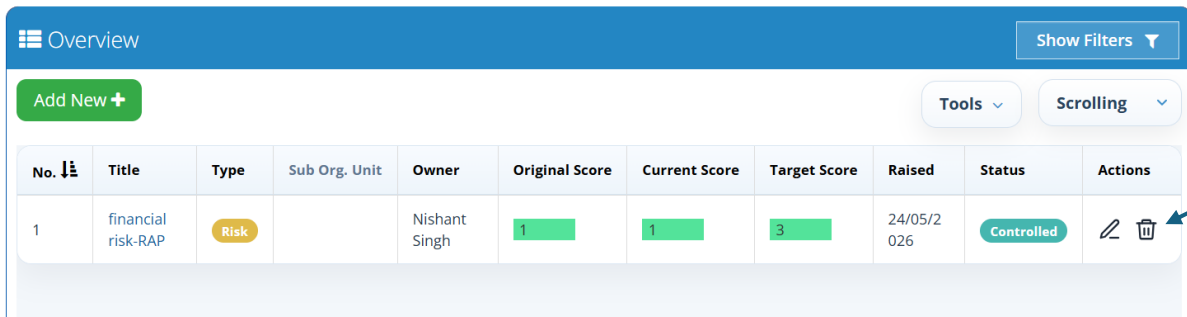

Why This Matters:

This makes actions easier to recognise and improves consistency across RAP pages.

How to Navigate:

- Log in to RAP
- Open pages that contain page-level action controls

- Review actions such as Edit, Delete, and related buttons
- Confirm the updated icons display correctly

No.	Title	Type	Sub Org. Unit	Owner	Original Score	Current Score	Target Score	Raised	Status	Actions
1	financial risk-RAP	Risk		Nishant Singh	1	1	3	24/05/2026	Controlled	 

1.3 Navigation UI – Sidebar Icons Added

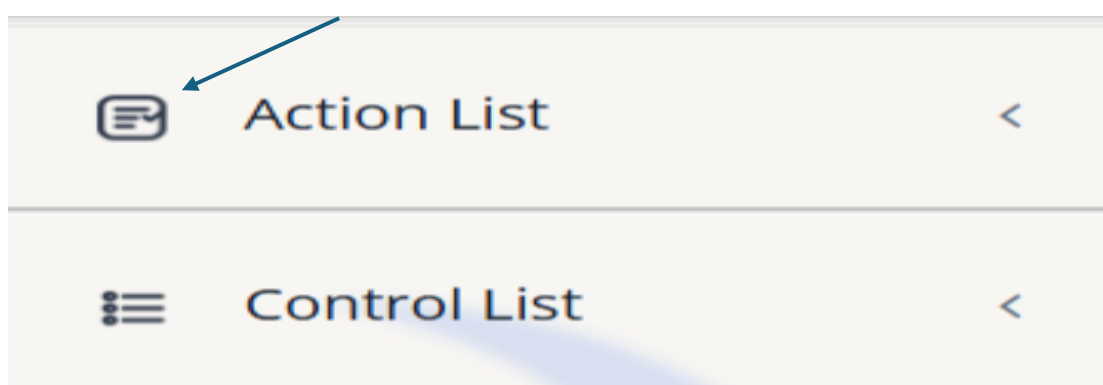

Icon assets have been added for sidebar navigation items to improve clarity and visual consistency.

Why This Matters:

This helps users identify navigation options more quickly and provides a more modern and consistent interface.

How to Navigate:

- Log in to RAP
- Review the left-hand sidebar navigation
- Open different menu items from the sidebar
- Confirm the updated navigation icons are visible and aligned correctly

1.4 Application UI – Table UI Standardisation

Table layouts across the Risk Assurance Platform have been redesigned and standardised for improved readability and presentation.

Why This Matters:

This improves consistency across list and table views and makes data easier to review.

How to Navigate:

- Log in to RAP
- Open pages that display tables or lists, such as dashboard lists, action lists, and risk-related screens
- Review table headers, row spacing, alignment, and layout
- Confirm the updated table styling appears consistently

Personal List

Overview										
Add New +		Show Filters ▼								
		Tools ▼		Scrolling ▼						
No. ⌵	Title	Type	Sub Org. Unit	Owner	Original Score	Current Score	Target Score	Raised	Status	Actions
1	financial risk-RAP	Risk		Nishant Singh	1	1	3	24/05/2026	Controlled	

1.5 Platform Experience – Error Page for Connectivity Issues

A user-friendly error page has been implemented to handle temporary network or server connectivity issues.

Why This Matters:

This provides clearer feedback to users when connection or server issues occur and improves the overall support experience.

1.6 Help Module – Support Page Added

A dedicated Support page has been added to provide users with easier access to support-related information.

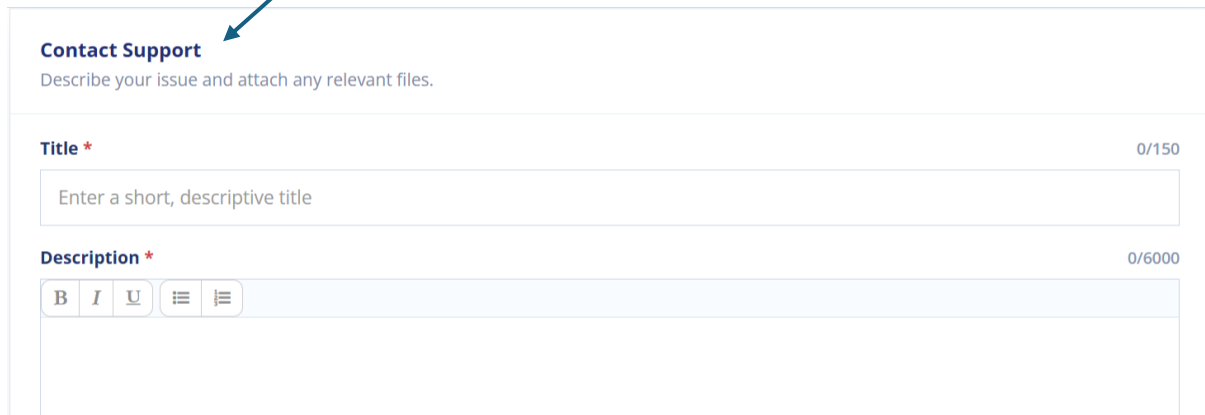

Why This Matters:

This gives users a clearer path to support information directly within RAP.

How to Navigate:

- Log in to RAP
- Click the Help icon or open the relevant support area
- Open the Support page

- Confirm the page opens correctly and displays support page

Contact Support
Describe your issue and attach any relevant files.

2. Improvements

2.1 Dashboard Notifications – Accept All Issue Fix

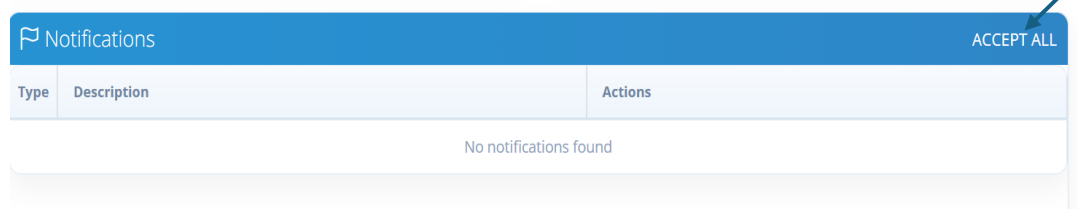

Fixed the issue where the Accept All button on the Dashboard Notifications panel did not acknowledge or clear all pending notifications when clicked.

Why This Matters:

This improves notification handling and ensures users can manage dashboard notifications more reliably.

How to Navigate:

- Log in to RAP
- Open the Dashboard
- Scroll down to the Notifications panel
- Click Accept All
- Confirm all pending notifications are acknowledged or cleared correctly

2.2 Navigation – Default Page Display Fix

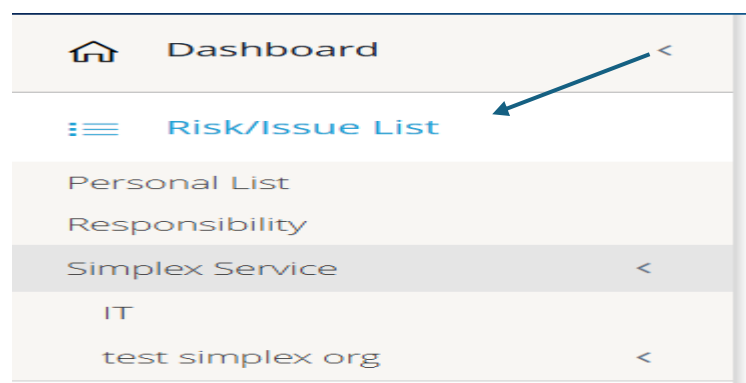

Fixed the issue where the default page was not displayed when navigating from the Organisation Unit list to the Risk, Issue, or Action list.

Why This Matters:

This improves navigation consistency and ensures users are taken to the correct default page.

How to Navigate:

- Log in to RAP
- Open the Organisation Risk list
- Navigate Back to a Risk/Issue list
- Confirm the expected default page is displayed correctly

2.3 Organisation Dashboard – Status Column Alignment Fix

Fixed the issue where the Status column was truncated in the Action and Top Risks lists when item titles were excessively long.

Why This Matters:

This improves readability and maintains a more consistent dashboard layout

How to Navigate:

- Log in to RAP
- Open the Organisation Dashboard
- Review the Action and Top Risks lists
- Check records with longer titles
- Confirm the Status column displays correctly without truncation issues

↶ Action List			
Done	Due Date	Mitigation Action	Status
☐	27/05/2026	test	Overdue

2.4 FAQ to Organisation Dashboard – Server Error Fix

Fixed the issue where navigating from the FAQ page to the Organisation Dashboard resulted in a server error.

Why This Matters:

This improves navigation reliability and prevents unexpected interruptions when moving between help content and dashboard views.

How to Navigate:

- Log in to RAP
- Open the Help icon
- Navigate to the FAQ page
- From the FAQ page, navigate to the Organisation Dashboard
- Confirm the dashboard opens correctly without a server error

Summary of Benefits

- Improved dropdown usability and visual consistency
- Better recognition of page-level actions through updated icons
- Clearer sidebar navigation with improved iconography
- More consistent and readable table layouts across RAP
- Better user guidance during temporary network or server issues
- Easier access to support information within the application
- More reliable dashboard notification handling
- Improved navigation flow between organisation and list pages
- Better dashboard readability for longer item titles
- More stable navigation from FAQ content to dashboard pages
- A smoother and more consistent overall user experience
